dhanavijayan@Dhanavijayans-MacBook-Air ~ % diskutil
Disk Utility Tool
Utility to manage local disks and volumes
Most commands require an administrator or root user

WARNING: Most destructive operations are not prompted

Usage:  diskutil [quiet] <verb> <options>, where <verb> is as follows:

     list                (List the partitions of a disk)
     info[rmation]       (Get information on a specific disk or partition)
     listFilesystems     (List file systems available for formatting)
     listClients         (List all current disk management clients)
     activity            (Continuous log of system-wide disk arbitration)

     u[n]mount           (Unmount a single volume)
     unmountDisk         (Unmount an entire disk (all volumes))
     eject               (Eject a disk)
     mount               (Mount a single volume)
     mountDisk           (Mount an entire disk (all mountable volumes))

     enableJournal       (Enable HFS+ journaling on a mounted HFS+ volume)
     disableJournal      (Disable HFS+ journaling on a mounted HFS+ volume)
     moveJournal         (Move the HFS+ journal onto another volume)
     enableOwnership     (Exact on-disk User/Group IDs on a mounted volume)
     disableOwnership    (Ignore on-disk User/Group IDs on a mounted volume)

     rename[Volume]      (Rename a volume)

     verifyVolume        (Verify the file system data structures of a volume)
     repairVolume        (Repair the file system data structures of a volume)
     verifyDisk          (Verify the components of a partition map of a disk)
     repairDisk          (Repair the components of a partition map of a disk)

     eraseDisk           (Erase an existing disk, removing all volumes)
     eraseVolume         (Erase an existing volume)
     reformat            (Erase an existing volume with same name and type)
     eraseOptical        (Erase optical media (CD/RW, DVD/RW, etc.))
     zeroDisk            (Erase a disk, writing zeros to the media)
     randomDisk          (Erase a disk, writing random data to the media)
     secureErase         (Securely erase a disk or freespace on a volume)

     partitionDisk       ((re)Partition a disk, removing all volumes)
     addPartition        (Create a new partition to occupy free space)
     splitPartition      (Split an existing partition into two or more)
     mergePartitions     (Combine two or more existing partitions into one)
     resizeVolume        (Resize a volume, increasing or decreasing its size)

     appleRAID <verb>    (Perform additional verbs related to AppleRAID)
     coreStorage <verb>  (Perform additional verbs related to CoreStorage)
     apfs <verb>         (Perform additional verbs related to APFS)
     image <verb>        (Perform additional verbs related to DiskImage)

diskutil <verb> with no options will provide help on that verb

Changing password for dhanavijayan.
Old Password:
dhanavijayan@Dhanavijayans-MacBook-Air ~ % pwpolicy
Warning: applying command to user <dhanavijayan>
Usage: pwpolicy [-h]
Usage: pwpolicy [-v] [-a authenticator] [-p password] [-u username | -c computername]
                [-n nodename] command command-arg
Usage: pwpolicy [-v] [-a authenticator] [-p password] [-u username | -c computername]
                [-n nodename] command "policy1=value1 policy2=value2 ..."

  -a       name of the authenticator
  -c       name of the computer account to modify
  -p       password (omit this option for a secure prompt)
  -u       name of the user account to modify
  -h       help
  -n       directory-node to search, uses search node by default
  -v       verbose

          getglobalpolicy       Get global policies.  DEPRECATED.  Use getaccountpolicies with no user.
          setglobalpolicy       Set global policies.  DEPRECATED.  Use setaccountpolicies with no user.
                getpolicy       Get policies for a user.  DEPRECATED.  Use getaccountpolicies.
     get-effective-policy       Gets the combination of global and user policies that apply to the user.  DEPRECATED.
                setpolicy       Set policies for a user.  DEPRECATED.  Use setaccountpolicies
             setpassword        Set a new password for a user
              enableuser        Enable a user account that was disabled
             disableuser        Disable a user account
       getglobalhashtypes       Returns a list of password hashes stored on disk by default.
       setglobalhashtypes       Edits the list of password hashes stored on disk by default.
             gethashtypes       Returns a list of password hashes stored on disk for
                                a user account.
             sethashtypes       Edits the list of password hashes stored on disk for
                                a user account.
       getaccountpolicies       Gets the account policies for the user, or globally if no user.
       setaccountpolicies       Sets the account policies for the user, or globally if no user.
                                Required argument is a path to a file containing an XML plist of policies.
    authentication-allowed      Evaluates policies to determine if the user is allowed to authenticate
